Noida, Uttar Pradesh, India | +91-7973649379 | nikk2877124@gmail.com | linkedin.com/in/nikhil-kumar-844b3430b | github.com/nikk2877124-source

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate (B.Tech, 2026) with 6+ months of intensive Data Science internship experience and hands-on expertise in data analysis, machine learning, business intelligence, and predictive analytics. Proficient in Python, SQL, MySQL, Pandas, NumPy, Power BI, and Scikit-learn, with a strong track record of building end-to-end analytics pipelines, interactive dashboards, and ML models. Skilled in data cleaning, exploratory data analysis, feature engineering, statistical analysis, data storytelling, and business-focused SQL analysis. Currently developing an AI-powered Business Intelligence assistant using FastAPI, MySQL, SQLAlchemy, Pandas, Ollama, and Streamlit. Passionate about translating complex datasets into actionable business insights and data-driven decision-making.

EDUCATION

Sardar Beant Singh State University (SBSSU), Gurdaspur, Punjab

Bachelor of Technology — Computer Science | 2022 – 2026

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Statistics for Data Science, Machine Learning, Data Warehousing & Mining, Operating Systems, Computer Networks, Software Engineering

Government Model High School

Higher Secondary Education — Science | 2020 – 2022

EXPERIENCE

Data Science Project Intern | Solitaire Infosys

Sahibzada Ajit Singh Nagar, Punjab | Jan 2026 – Jun 2026

- Designed and developed Influence Guard AI, an end-to-end machine learning solution to profile and flag fraudulent or inauthentic influencer activity, processing 50,000+ rows of social media engagement data.
- Executed comprehensive data preprocessing, cleaning, feature engineering, and exploratory data analysis using Python, Pandas, and NumPy, improving dataset quality by 35% and reducing model training time by 25%.
- Implemented Isolation Forest anomaly detection and supervised learning techniques to identify suspicious behavioral patterns, achieving 88% accuracy and 85% precision in fraud detection.
- Built 3 interactive Power BI dashboards and Python visualizations (Matplotlib, Seaborn) to communicate business-oriented insights to stakeholders, reducing manual reporting time by 40%.
- Completed an intensive Data Science training track covering data cleaning, EDA, feature engineering, statistical modeling, and supervised/unsupervised machine learning model development.

Python Data Science Intern | Croma Campus

Noida, Uttar Pradesh | Jun 2025 – Aug 2025

- Performed data cleaning, analysis, and visualization on 10+ real-world datasets (sales, customer, operational) using Python, Pandas, NumPy, Matplotlib, and Seaborn, identifying key business trends.
- Conducted exploratory data analysis and statistical hypothesis testing to uncover hidden patterns, driving data-informed recommendations for business stakeholders.
- Developed practical skills in data-driven problem-solving, analytical storytelling, and translating raw data into compelling visual narratives for decision-makers.

Data Analytics Virtual Intern | Deloitte Australia (via Forage)

Virtual Program | Apr 2025 – May 2025

- Completed Deloitte's Data Analytics Job Simulation, gaining hands-on exposure to consulting-style analytics case studies, structured problem-solving, and client-facing deliverables.
- Performed data cleaning, transformation, and statistical analysis on complex business datasets to identify actionable insights, trends, and growth opportunities for simulated client scenarios.
- Created executive-level data visualizations and interactive dashboards to communicate analytical findings to diverse stakeholder audiences in a clear, business-focused manner.
- Applied structured analytical thinking and hypothesis-driven frameworks to translate ambiguous business problems into data-driven solutions and strategic recommendations.

Python Intern | HopingMinds

Sahibzada Ajit Singh Nagar, Punjab | Jun 2023 – Jul 2023

- Developed an AI-powered conversational chatbot using a Large Language Model (LLM) API and Python, implementing backend logic and API integration to process user queries.
- Gained hands-on exposure to Generative AI, API integration, and real-world conversational AI application development, handling 500+ simulated user interactions.
- Collaborated on designing prompt engineering strategies to optimize response accuracy and user engagement for the chatbot application.

PROJECTS

Blinkit Grocery Data Analysis | Python • Pandas • MySQL • Power BI

- Developed an end-to-end grocery sales analytics pipeline using Python/Pandas for data cleaning and exploratory data analysis on 20,000+ transaction records from multiple outlets.
- Performed advanced business-focused SQL analysis in MySQL to investigate sales performance across product categories, outlet types, and locations, identifying top 10 underperforming outlets.
- Designed and deployed an interactive Power BI dashboard with 15+ KPIs and drill-down capabilities to visualize sales performance, inventory trends, and regional demand patterns, enabling data-driven inventory and pricing decisions.

Influence Guard AI | Python • Pandas • Scikit-learn • Streamlit • MySQL • Machine Learning

- Developed a machine learning solution to detect potentially fraudulent or inauthentic influencer accounts using engagement and behavioral data from 5,000+ social media profiles.
- Engineered 15+ features including follower count, engagement rate, likes, comments, shares, saves, and follower growth velocity to train robust anomaly detection models.
- Applied Isolation Forest and statistical outlier detection to identify suspicious account behavior, achieving 85% precision and 88% accuracy in fraud classification.
- Built and deployed an interactive Streamlit web application for real-time influencer profiling, dataset exploration, and fraud detection visualization with dynamic filtering.

E-commerce Sales Analysis | Python • SQL • Power BI

- Analyzed 30,000+ e-commerce orders to identify sales trends, product performance metrics, customer segmentation patterns, and seasonal revenue fluctuations.
- Performed data cleaning, outlier treatment, and exploratory analysis using Python and SQL to prepare datasets for automated business reporting and stakeholder presentations.
- Created comprehensive Power BI dashboards with customer cohort analysis, RFM segmentation, and revenue forecasting visualizations, supporting data-driven marketing and inventory strategies.

Fit Genie | Python • FastAPI • Gemini API • Generative AI • API Integration

- Developed Fit Genie, an AI-powered fitness coach application using FastAPI and the Gemini API, delivering personalized workout plans, nutrition guidance, and AI chat assistance to users through a scalable backend architecture.
- Implemented secure user authentication, profile management, and RESTful API endpoints to support real-time AI-driven fitness recommendations and interactive user experiences.
- Built a smart, interactive fitness platform leveraging Generative AI and API integration, enabling personalized health coaching through natural language interactions and dynamic content generation.

Insight AI (In Progress) | FastAPI • MySQL • SQLAlchemy • Pandas • Ollama • Streamlit

- Building an AI-powered Business Intelligence assistant that enables non-technical users to upload datasets and interact with data using natural language queries and automated insight generation.
- Developing AI-assisted workflows for automated data cleaning, intelligent SQL query generation, dynamic visualization creation, and automated insight/report generation using LLMs.
- Integrating FastAPI, MySQL, SQLAlchemy, Pandas, Ollama (local LLM), and Streamlit into a scalable end-to-end analytics pipeline with RESTful API architecture.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, MySQL, DAX

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, DAX, Excel, Jupyter Notebook, Google Colab

Machine Learning & AI: Scikit-learn, Machine Learning (Regression, Classification, Clustering, Anomaly Detection), Generative AI, Ollama, Gemini API, Feature Engineering, Model Evaluation, Time Series Analysis, Predictive Analytics

Backend & Data Tools: FastAPI, SQLAlchemy, Streamlit, REST API, API Integration, Git, GitHub, VS Code

AI & Productivity Tools: Codex, GitHub Copilot, Gemini

Core Competencies: Data Cleaning, Data Preprocessing, EDA, Statistical Analysis, Data Storytelling, Business Insights, Dashboard Development, A/B Testing, Data Warehousing, Database Design

CERTIFICATIONS

- Prompt Engineering Certification — Be10x | Jun 2024
- Data Analytics Internship Certificate — Solitaire Infosys | Jan 2026 – Jul 2026
- Deloitte Australia - Data Analytics Job Simulation — Forage | Apr 2025
- Certification of Achievement — Croma Campus Pvt. Ltd | Jun 2025 – Aug 2026
- Certification of Completion — HopingMinds | Jun 2023 – Jul 2023
- Foundations of Prompt Engineering — AWS Skillbuilders Community | Jul 2026
- Microsoft Power BI — Self-Directed Learning | Apr 2026

ACHIEVEMENTS & EXTRACURRICULAR

- Developed and deployed 5+ end-to-end data analytics and machine learning projects with measurable business impact, including fraud detection, sales intelligence, and AI-powered fitness coaching systems.
- Selected for Deloitte Australia Data Analytics Job Simulation, demonstrating strong analytical and consulting capabilities among peer participants.
- Built a production-ready ML-powered fraud detection system (Influence Guard AI) achieving 88% accuracy, showcased as a capstone project during the Solitaire Infosys internship.

LANGUAGES

- English (Professional Working Proficiency)
- Hindi (Native)
